Proposed Problem Statements (Based on AdForge AI Scenarios)

Here is how we can break down the user challenges into the exact template structure:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 <i>(Small Business Owner)</i>	A solo e-commerce founder launching a new product (e.g., wireless earbuds).	Create engaging, platform-optimized ad copies for Instagram, Facebook, and Google Ads simultaneously.	I don't have the budget for a professional copywriter or the time to draft dozens of variations.	Each platform has completely different guidelines, character limits, and visual styling rules.	Overwhelmed and anxious about wasting limited ad spend on low-converting copy.
PS-2 <i>(B2B SaaS Marketer)</i>	A digital marketer promoting a professional SaaS software platform.	Generate strict, high-converting Google Search headlines and value-driven Facebook campaigns.	Writing professional copy that strictly adheres to Google's 30-character limit is incredibly tedious.	Generic AI tools write robotic, non-compliant text, and manual testing takes too long.	Frustrated and bottlenecked, which delays our lead-generation timelines.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-3 (<i>E-commerce Manager</i>)	An online campaign manager running a high-stakes, limited-time flash sale.	Quickly deploy urgency-driven, high-converting ad copy across all marketing channels.	I have to act instantly and cannot afford to spend hours adjusting copy angles by hand.	Flash sales require immediate execution, and copy delays result in lost sales and missed traffic.	Pressured and stressed about missing the peak conversion window.
