

ADFORGE AI - AUTOMATED MULTI-PLATFORM COPY SYSTEM

Data Flow Diagram Document

Date: 7th July 2026

Development Profile: Sunehri Sharma

Maximum Marks: 2 Marks

Project Name: AdForge AI - Automated Multi-Platform Copy System

DATA FLOW DIAGRAM

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

Symbol	Name	Description
	External Entity	A person, organization, or system outside the project boundaries that sends or receives data (e.g., User, Groq API).
	Process	An activity that transforms incoming data into outgoing structured data streams (e.g., Validate Request, Orchestrate Prompt).
	Data Store	A place where data is temporarily or permanently held for execution use (e.g., Local Session Cache, Environment Config).
	Data Flow	The movement of data between entities, processes, and data stores, labeled with the specific datasets being passed.

SYSTEM DATA FLOW DIAGRAM (LEVEL-1 DFD)
