

ADFORGE AI — PROJECT DOCUMENTATION

Project Executable Files & Execution Guide

Date: 7th July 2026

Developer Profile: Sunehri Sharma

Maximum Marks: 3 Marks

Step 1: Project Links & Access

Resource Type	URL / Access Link
Source Code Repository (GitHub)	https://github.com/sunehrisharma2006-a11y/AdForge-AI-AI-Powered-Advertisement-Copy-Generator-.git
Live Deployed Application (ngrok Tunnel)	https://embroider-freckles-overture.ngrok-free.dev
Demo Video Link (Google Drive)	[https://drive.google.com/file/d/1cVwfu07WkXTY1_uMh5VBBgQD_OOSAHAP/view?usp=sharing]

Step 2: Key Executable Files & Folder Structure

S.No	Folder / File Name	Description & Purpose
1	app.py	The main entry point for the Python Flask backend server. It manages the content creation endpoints and handles secure Groq cloud client routing.

S.No	Folder / File Name	Description & Purpose
2	/static	The client-side asset directory holding UI elements (main.js, style.css) that render the single-page application interface.
3	/templates/index.html	The HTML core layout template file used by Flask to deliver the primary user interface workspace view.
4	.gitignore	Security rule file instructing Git to ignore local dependencies (adforge-env/) and private credentials (.env) during uploads.

Step 3: Local Setup & Execution Instructions

Step	Action / Terminal Command	Expected Outcome / Notes
1	git clone https://github.com/sunehrisharma2006-a11y/AdForge-AI-AI-Powered-Advertisement-Copy-Generator-.git	Downloads the complete structural project code files from the cloud repository to the machine.
2	pip install -r requirements.txt	Installs all required framework packages globally inside the workspace container.
3	Configure .env variables	Create a local environment file containing personal authentication keys securely.
4	python app.py	Boots up the local execution server mapping to address http://127.0.0.1:5000.
5	ngrok http 5000	Exposes the application port out to an absolute public host route instantly.
