

• ADFORGE AI — PROJECT DOCUMENTATION

• Functional Features Included in the Solution

- **Date:** 7th July 2026
- **Development Profile:** Sunehri Sharma
- **Maximum Marks:** 5 Marks

Proposed Functional Features Matrix

S.No	Feature Name	Description & Purpose	Module / Layer	Status
1	Multi-Platform Adaptation Trigger	Enables the simultaneous drafting and formatting of specialized ad creatives for Google, Facebook, and Instagram out of a single product text input box using Groq's LLaMA 3.3 engine.	Core AI Application Layer	Completed
2	Dynamic Brand Voice Selector	Provides a clickable visual persona grid layout allowing the user to select custom brand messaging tones (e.g., Playful, Urgent, Luxury) to systematically alter text vocabulary models.	Frontend UI Dashboard	Completed
3	Google Ads Boundary Enforcer	Enforces a strict visual and functional character limit truncation layer to guarantee all generated Google search headlines remain under the platform-mandated 30-character metric.	Input Validation Layer	Completed
4	Native Emojis & Hashtag Pill	Auto-parses and structures Instagram results cards by injecting native, contextual	Response Processing	Completed

S.No	Feature Name	Description & Purpose	Module / Layer	Status
	Injection	emojis and clear, optimized hashtag groupings to maximize organic platform reach.	Module	
5	Asynchronous Interactive Refinement Loop	Integrated prompt adjustment sub-panel allowing users to submit dynamic modification requests (e.g., <i>"Make it sound more urgent"</i>) to update specific copy blocks via Fetch API scripts.	Refinement Loop Engine	Completed
6	One-Click Clipboard Export Action	Leverages modern client-side navigator properties to quickly copy finalized ad copy variations to the user's local system clipboard for immediate execution.	Output Canvas Component	Completed
7	Secure Local Configuration Guard	Automatically reads local system environment variables (.env) to check valid Groq API credentials before loading active generation workspaces, avoiding hardcoded key leaks.	Security & Infrastructure	Completed
