

AdForge AI

- Automated Multi-Platform Copy System

Brainstorming & Idea Prioritization

- **Date:** 15 March 2024
- **Development Profile:** Sunehri Sharma
- **Project Name:** AdForge AI - Automated Multi-Platform Copy System
- **Maximum Marks:** 3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage to build a comprehensive asset generation engine.

S.No PDF	Team Member PDF	Idea / Suggestion PDF	Category PDF	Group No. PDF
1	Sunehri Sharma	Build a Multi-Platform Ad Copy Generator leveraging the LLaMA 3.3 model on Groq, tailored strictly to the constraints of Instagram, Google Ads, and Facebook.	Core Processing Engine	Group 1
2	Sunehri Sharma	Implement a Real-Time Copy Refiner Workspace that takes existing text snippets and updates them asynchronously using human feedback directives.	Optimization Engine	Group 2
3	Sunehri Sharma	Create a dark-themed Glassmorphism Split-Panel Dashboard featuring interactive voice tone selection matrices, status messages, and single-click content exporting (Copy All / JSON Download).	User Interface Framework	Group 3
4	Sunehri	Set up a Public Sharing/Mirroring Deployment Engine using pyngrok to	Infrastructure	Group

S.No PDF	Team Member PDF	Idea / Suggestion PDF	Category PDF	Group No. PDF
	Sharma	tunnel local development instances out to secure public URLs for remote client evaluation.	& Hosting	4
5	Sunehri Sharma	Integrate a deep-learning predictive Click-Through Rate (CTR) Analytics Dashboard to score variations before they are deployed live.	Post-MVP Analytics	Group 5

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No. PDF	Final Idea PDF	Feasibility (High/Medium/Low) PDF	Importance (High/Medium/Low) PDF	Priority PDF	Selected (Yes/No) PDF
1	Multi-Platform AI Generation Engine (LLaMA 3.3 orchestration via strict JSON format).	High	High	1	Yes
2	Asynchronous Interactive Refiner Workspace (Iterative prompt adjustments with a modifications changelog).	High	High	2	Yes

Group No. PDF	Final Idea PDF	Feasibility (High/Medium/Low) PDF	Importance (High/Medium/Low) PDF	Priority PDF	Selected (Yes/No) PDF
3	Async UI Framework with Data Handlers (Tone grids, rolling loading animations, and rapid download features).	High	High	3	Yes
4	Public Tunneling Deployment System (Using secure pyngrok mirrors to instantly run the app on remote devices).	High	Medium	4	Yes
5	Live Performance Analytics Engine (Tracking active campaign spend data and consumer conversions).	Medium	Low	5	No

Project Executive Summary: > By focusing engineering efforts on Groups 1 through 4, **AdForge AI** delivers an end-to-end workspace matching modern full-stack development standards. It couples

structured data parsing (JSON outputs) with seamless backend operations (asynchronous Flask routes) and handles local-to-cloud delivery mechanics natively.
